The MultiChoice® Universal Valve R10000:
Versatile. Trusted. Proven.

Our MultiChoice® Universal Valve R10000 works with an array of shower trim styles. Simply rough-in the valve behind the wall and decide on a trim style later. That means a seamless, streamlined construction process for you—and easier remodels for homeowners down the road.

THERE'S A REASON TRADE PROS USE IT.

ACTUALLY, THERE ARE LOTS OF REASONS.

VERSATILE

Pairs with shower trims across the Delta Faucet Company portfolio, from three of the industry's leading brands: Peerless®, Delta®, and Brizo®.

SMART

No more lost cartridges. We ship the cartridge with the trim, so there's nothing to keep track of.

CONVENIENT

Easy to mount. Factory options for all industry-standard plumbing types (IPS, PEX, Universal).

TRUSTED

Over the past 15 years, trade pros have installed over 35 million* MultiChoice® Universal Valve R10000s.

*based on sales to-date in 2021

PRACTICAL

Square plaster guard allows for simple 90° cuts and snaps into place.

WELL-DESIGNED

Heat-resistant pressure test cap allows for air or water testing before valve cartridge is installed.
